Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37, recitation of "vice versa" is improper.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 37-39,41 and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by Ginn, et al or Bacich et al

Each of Ginn, et al and Bacich, et al discloses a surgical clamp comprising an elongate, one piece, malleable hollow shaft including a distal end and proximal end.

The clamp further comprises a clamp assembly with first and second opposably movable jaws, a handle assembly and an elongate actuator disposed within the hollow shaft as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37-39, 41 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over McGuire in view of either of Bacich, et al or Ginn, et al. McGuire discloses a surgical knife having a malleable shank. Bacich, et al and Ginn, et al teaches the equivalence between surgical tools such as knives, clamps, forceps, etc all used in combination with malleable shafts. To modify the instrument of McGuire to a clamp or forcep would have been obvious from the teachings of Bacich, et al or Ginn, et al as being substantially equivalent elements.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 37-39, 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Lucey, et al.

Claim 37 utilizes a open ended transitional phrase "comprising" which does not preclude more than one element in the overall device. The segment 40 of Lucey, et al as a substructure of the total device clearly anticipates the claim as broadly worded.
